How does it work?

The employer will provide the actual job training, mentoring and support throughout the apprenticeship. The external training will be managed by Tyne North Training which can include college workshop activities and classroom training. Depending upon the your previous qualifications, the programmes and durations may vary.

The academic activities will take place at a range of specialist colleges or at Tyne North Training.

Why use Tyne North Training?

Recruitment

Tyne North Training adopts a robust recruitment process which includes:

- minimum entry requirement for apprentices
- internal testing (inc English, Maths and a mechanical reasoning test)
- Interview with an Engineering Training Officer to assess their suitability.

College Management

Tyne North Training has excellent partnership working relationships with specialist colleges. This enables Tyne North Training to design bespoke apprenticeship programmes which align to the needs of employers.

Expert Training Officers

Our time served Training Officers add that extra dimension of support your future apprenticeship.
